XENOPHOBE
TECHNICAL SUPPLEMENT

IBM VERSION

Notes on Menu

Players	This option allows the choice of ONE or TWO players
Music	Use this option to turn the music ON or OFF
Sound effects	Use this option to turn the FX ON or OFF
Difficulty	The stronger the arm the more difficult the level
Ammunition	Setting this option switches between UNLIMITED and LIMITED ammunition (for a more difficult game)
Start Level	Sets up which space station you start on

Please check your selections before leaving this screen as they cannot be reset fron the main game screen

Xenophobe takes advantage of the individual advantages of your computer so this supplement lists the differences from the manual.
Controls:
IBM joystick movements remain the same.
Throw Bombs:

IBM Version	End Key for Player One
	Key for Player Two

Status Line:
You will find that Score and Health ratings have changed places on screen
Weapons and Fighting:
Your Exterminator will not be allowed to punch Invadors or other Players

To load the game switch to the relevant drive and then Type XENO.

The game is controlled by 2 Players using Joystick or 1 Player using Joystick and 1 Player on Keyboard.

Keyboard controls are the Cursor Keys and Space Bar to fire.

At the moment only player 1 is implemented.

Sound is provided with the use of an Ad-Lib sound board.

The programmer is working on a routine to make the keys redefinable. However this may well end up not working.

Only 1 bomb key is currently implemented and this may well change.
